

PARTNER TO TRANSFORM GLOBAL CANCER CARE

ICEC Giving Opportunities

The International Cancer Expert Corps offers a range of giving options to help customize your gift of cash or other assets that suit individual financial circumstances. In doing so, you may be able to make a more substantial gift than you thought possible. While one-time or recurring monthly cash donations are the most readily accessible contributions for an organization to receive, a gift made through planned giving is equally welcome. Planned giving refers to any significant gift that involves financial or estate planning. These gifts can provide substantial benefits both to you and to ICEC. Different types of planned gifts may include bequests, securities, charitable trusts, donor advised funds, life insurance policies, retirement plan assets, and donations of personal property.

To contribute online, go to <https://www.iceccancer.org/donate/> or complete the mail-in donation form and send to ICEC. To learn more about other forms of giving, visit our website at <https://www.iceccancer.org/planned-giving/>. Questions? Feel free to contact ICEC at 202-478-1928. Your support of ICEC helps the many opportunities we pursue to transform global cancer care.

Make a One Time or Recurring Donation

Make a one time or recurring donation, or gift in memory or tribute. Donors contributing over \$1,000 will be listed on the ICEC website and included in the ICEC Annual Report unless requested otherwise.

ICEC Expert and Hub Programs Support

Our top priorities focus on support for our ICEC Experts working with ICEC Associates. These individuals and their respective institutions are key to forming an ever-expanding global network to deliver cancer care specifically, and health care generally, at world-class levels. For ICEC Experts, your contribution — including designated donations to specific funds such as the [Ellen Lewis Stovall Early Career Leaders Fund](#), [Rodney R. Million, MD Fund for Innovation in Clinical Care](#) and the [Henry S. and Leah Kaplan Human Rights and Service to Humanity Fund and Award](#) — are opening doors for talented doctors, researchers and investigators who are enriching learning and research opportunities around the globe while fostering an environment that supports and promotes cross-cultural interaction and respect. Learn more about these remarkable people on our website at <https://www.iceccancer.org/twinning-programs-overview/>

ICEC Associate and ICEC Central Programs Support

ICEC is providing ICEC Associates (health care practitioners in LMICs) with great opportunities to have access to and work with some of the best medical oncologists, radiation oncologists, physicists, oncology nurses and others who are traditionally only accessible in their own institutions or practices in high resource countries. Your support will provide the resources needed to enhance our program to recruit ICEC Associates.

Central Operations Working Group

ICEC, thus far, has progressed with minimal support from outside sources. To date, the equivalent of nearly \$1,000,000 in donated time and expenses has been contributed to the organization by members of the ICEC Board of Directors and of the ICEC Central Operations Working Group (COWG) as well as other volunteers who are committed to our mission. With your support, ICEC will be able to continue to advance the ICEC mentoring model worldwide.

Ellen Stovall Early Career Leaders Working Group Fund

Through competitive grants, this fund supports trainees and early career academic faculty and private practitioners with demonstrated global health interests who dedicate their efforts to implementing ICEC's unique mentorship model to develop sustainable cancer care in underserved communities worldwide and establishing person-to-person relationships with people on the ground.

Rodney R. Million, MD Fund for Innovation in Clinical Care

Through competitive grants, this fund supports trainees and early career academic faculty and private practitioners who provide new skill sets to the oncology team in cancer clinics and other areas within Low- and Middle-Income Countries worldwide that reflect an improvement in the quality of care and quality of life for cancer patients undergoing treatment.
