Partnering to transform global cancer care

MOTHERSLEGACYPROJECT
One woman • One family • One act of service • One at a time

HOW THE POWER OF STEM CAN BE EXPLORED IN REDUCING AND BRIDGING THE GAP AND EMPOWERMENT

Why is STEM necessary?

All avenues need to be exploited to minimise and bridge the gap if women are to contribute and profit equally from the potential of science and technology and participate meaningfully in a global knowledge society, to maintain families out of poverty and provide educational benefits to the next generation.

There are several reasons for the lack of women in STEM and however they need to be addressed as soon as possible because we need more women in STEM to address global challenges.

ORGANISERS AND SPEAKERS

Afton Arp Beutler-Reed

*International Vice President
Mothers Legacy Project
Director - GEO program
Global Education Opportunity Program*

Manjit Dosanjh

*Former Senior Advisor in Medical Applications
Champion for Women in Science
ENLIGHT Coordinator
STELLA Project Leader
University of Oxford / CERN / ICEC*

Petya Georgieva

*Communications Officer for the
South-East European
International Institute for
Sustainable Technologies (SEEIST)*

Eva Gousiou

*Electronics Engineer, Beams
Department, CERN
Advocacy and networking activities
(WIT)*

Laetitia van Haren

*Cultural Anthropologist
President-founder of SAHFA -
Smart Access to Health For All
Inventor-promotor of JamboMama!*

Rita Karl

*Senior Managing Director of the
STEM Media & Education
Department at Twin Cities PBS,
Executive Producer of SciGirls
programme*

Katherine Coffman

*Piramal Associate Professor of
Business Administration,
Harvard Business School*
